

# STONEWORKS

## DRYSTONE DYKING

## Method Statement

Date: 3-2-2016

<p><b>Methodology for repairs to the Kingswells east consumption dyke.</b> This methodology is in addition to our standard method statement for drystone walling which you have already received.</p>	
<ul style="list-style-type: none"> <li>• The methodology ethos is to repair the wall in the original style and to the original standard.</li> <li>• All original stone to be re-used</li> <li>• All stones end in</li> <li>• All stones crossing joints</li> <li>• Original random walling style to be followed. i.e. not coursed</li> <li>• <b>IF</b> client requires- mortar could be used on vulnerable sections (e.g. by steps at walkway through wall)- the mortar could be kept back from face of wall so original look of wall is not affected</li> </ul>	

Regards,
