Ancient Monuments and Archaeological Areas Act 1979 Scheduled Monument Consent Decision Notice

Case ID	201507387	Index No	M90140
Scheduled Monument	Elcho Castle		
Location/Address	Perth and Kinross		
Proposed Works	Masonry and roof repairs to the N and NE elevation of Elcho Castle, including the replacement or consolidation of eroded crowsteps on the NE tower, descaling and repointing works, the replacement of chimney cappings, repairs to flashings and slates, and alterations to steel water spouts.		

Historic Environment Scotland hereby **grants** scheduled monument consent for the works detailed below, subject to the attached conditions.

Consented Works:

- a) Masonry and roof repairs to the N and NE elevation of Elcho Castle, including the replacement or consolidation of eroded crowsteps on the NE tower, descaling and repointing works, the replacement of chimney cappings, repairs to flashings and slates, and alterations to steel water spouts.

as described in your application dated 23 February and the following supporting documents:

- 1) Site plan and photographs - 312/140/079
- 2) Roof plan - 312/140/080
- 3) Photo sheet - 312/140/081
- 4) North elevation - 312/140/082
- 5) East elevation - 312/140/083
- 6) Description of proposed works
- 7) Email from the landowner (HES has guardianship over Elcho Castle, not ownership) to the applicant dated 11 March 2016 confirming that they were content with the proposed works.

Conditions referred to above

1. No works (other than initial inspection) shall be undertaken on the crowsteps of the NE Tower until the applicant has submitted and had approved by Historic Environment Scotland a detailed report and updated drawings showing the desired remedial works.

Reason: to ensure that the work is carried out without detriment to culturally significant historic fabric.

Historic Environment Scotland

2. A series of annotated photographic records taken before, during, and after the works to show the replacement or consolidation of eroded crowsteps on the NE tower, the replacement of chimney cappings, alterations to steel water spouts, and general views of the roof repairs should be submitted to Historic Environment Scotland within 4 weeks of completing the works on site.

Reason: to provide an accurate record of the site before, during, and after the various works have been completed.

Reasons for the Decision:

Subject to compliance with the schedule of conditions, the works proposed are considered acceptable in meeting the terms of national policy for scheduled monuments, and also accounting for other material considerations.
