

THE ANCIENT MONUMENTS AND ARCHAEOLOGICAL AREAS ACT 1979 3314
ENTRY IN THE SCHEDULE OF MONUMENTS

The monument known as Stanydale, settlement, field system and cairns 620m ENE of Pund of Lea comprises the remains of at least five prehistoric buildings, including the structure known as 'Stanydale Temple', set within a complex of enclosures and field boundaries. It also includes six standing stones, four burial cairns and at least 82 clearance cairns. The buildings, field banks and cairns are visible as upstanding earthworks, but the monument also includes associated buried archaeological features. The remains are most likely to be later Neolithic or Bronze Age in date (approximately 3500 to 800 BC). The buildings lie on undulating ground between 20m and 50m above sea level in the basin of a small burn that drains SE. Three of the four burial cairns lie at least 50m above sea level on a ridge known as Hamars that overlooks the head of Scutta Voe some 400m to the SW. The area to be scheduled is irregular on plan, to include the remains described above and an area around them within which evidence relating to the monument's construction, use and abandonment may survive. The scheduling specifically excludes the above-ground elements of all post-and-wire fences, gates, signs and information boards to allow for their maintenance. The monument, which lies in the Parish of Sandsting and the County of Orkney and Zetland as shown in red on the Plan annexed and executed as relative hereto

 is hereby included in the Schedule of Monuments appearing to the Scottish Ministers to be of national importance compiled and maintained by them under section 1(1) of the Ancient Monuments and Archaeological Areas Act 1979.

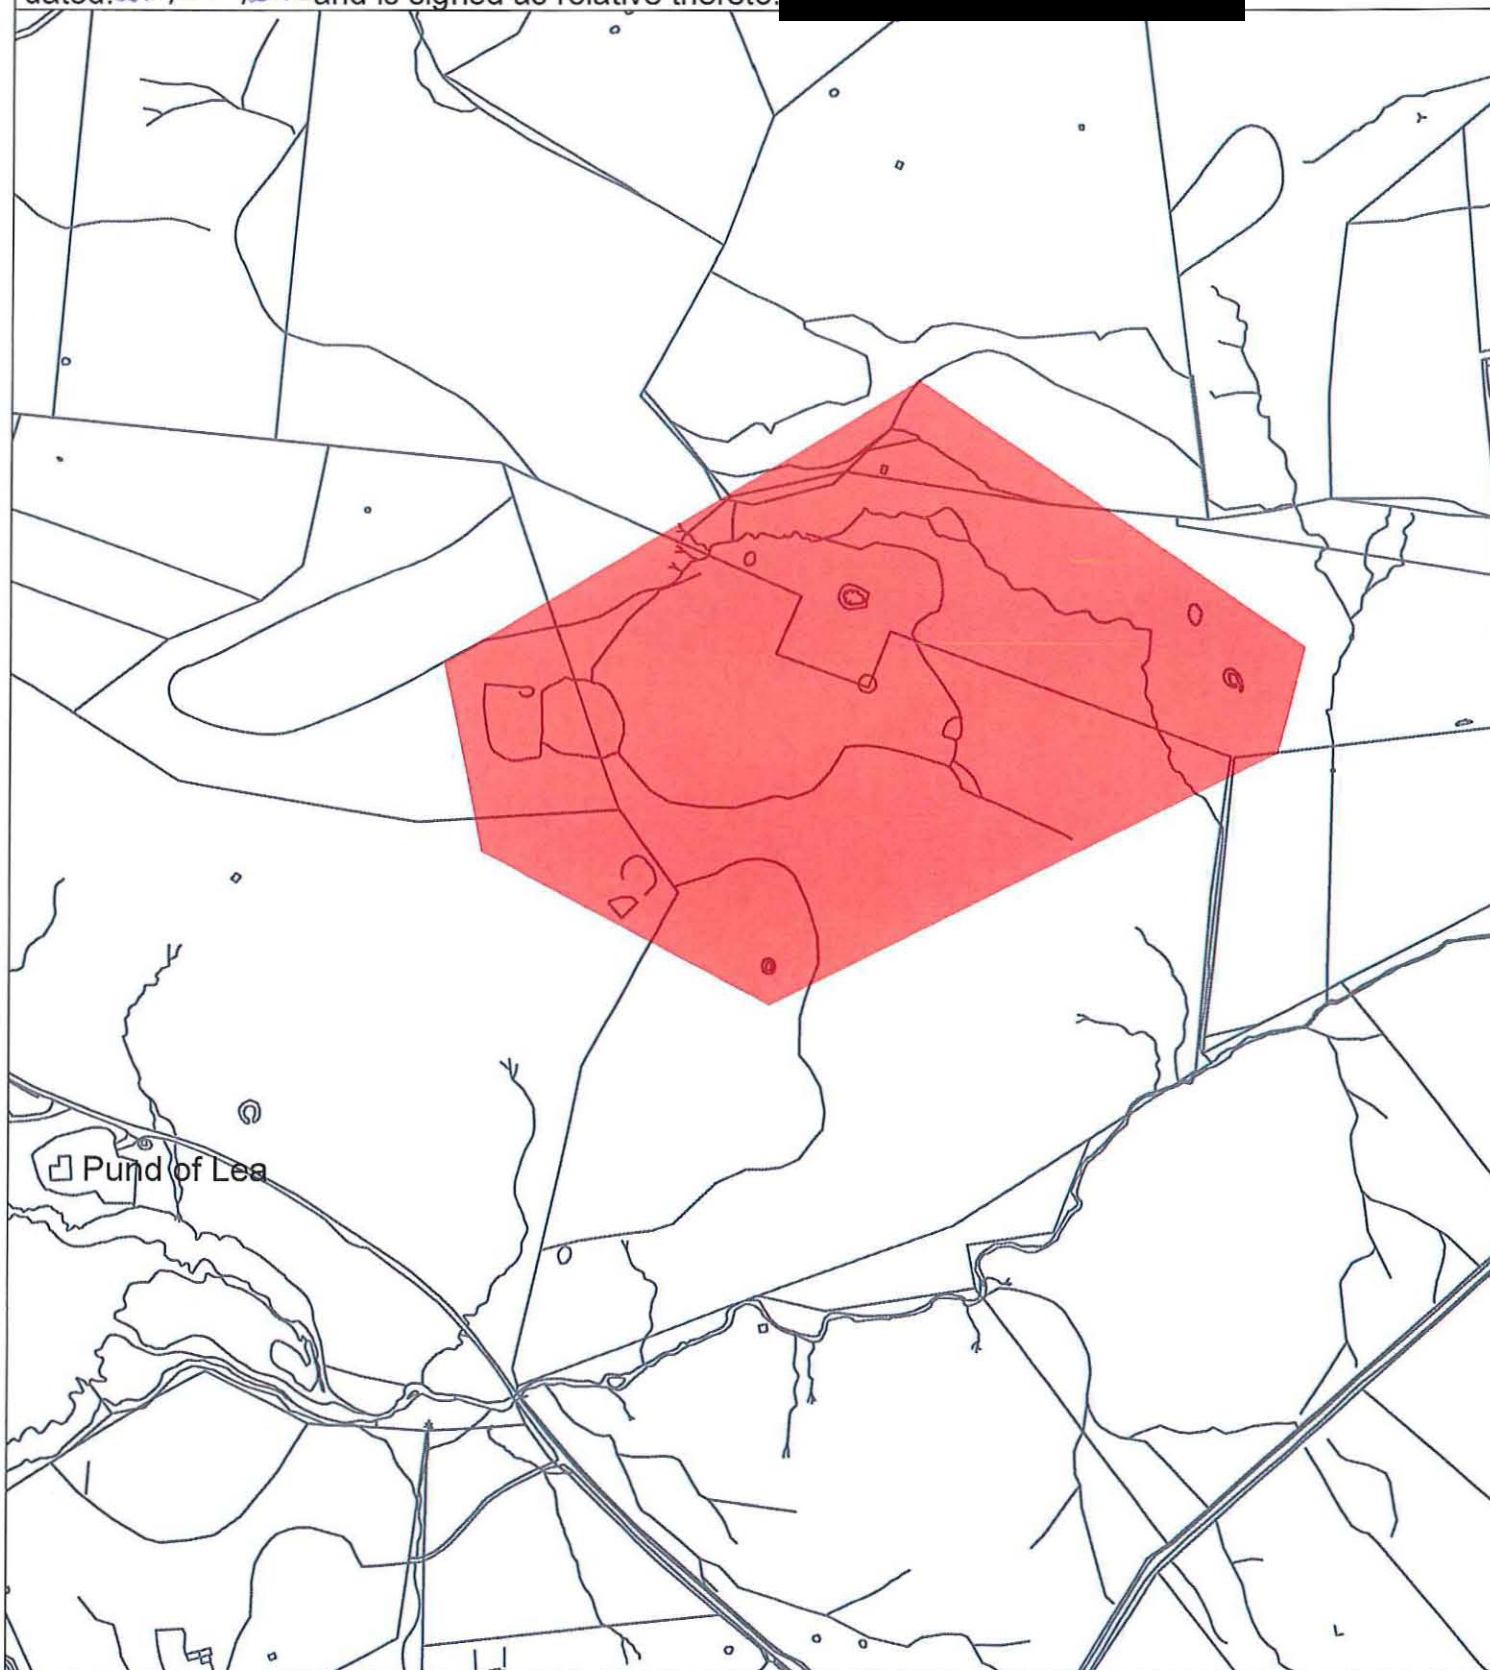

Subscribed by Olwyn Owen, Head of Scheduling, Marine and Battlefields with Historic Scotland, being an officer of the Scottish Ministers at Edinburgh on the 26th day of September Two thousand and twelve, before this witness Christine Kelly, of Longmore House, Salisbury Place, Edinburgh.
