THE ANCIENT MONUMENTS AND ARCHAEOLOGICAL AREAS ACT 1979 5221
ENTRY IN THE SCHEDULE OF MONUMENTS

The monument known as 1 Greenburn, enclosure and pit alignments 190m N of comprises the remains of an enclosure, pit alignment and several linear ditches, visible as cropmarks of probable later prehistoric date. They are located between 140m and 165m above sea level on a small crest on the S face of an unnamed hill, east of the Lint Burn. The monument survives as a series of truncated features visible in cropmarks. The enclosure is defined by a single ditch that encloses an area of 45m N-S. The ditch is between 1-3m in width and there are three breaks in the circuit. Within the interior of the enclosure are two roughly circular features. To the south of the enclosure is a long curving linear ditch, totalling 420m in length. At various points along its length, and parallel to it, short sections of pit alignments are visible, the longest segment being 65m in length. A further ditch exists to the east of the enclosure, running SSE-NNW for a distance of 125m. At its N end it then turns sharply west, running 100m in this direction in a slightly sinuous line. A few small gaps exist in this N section, and a short segment of pit alignment is present halfway along its length. Several short lengths of linear cropmarks, which appear to be pit alignments, run parallel to parts of both these features. A number of scattered and indeterminate cropmarks are also visible in the space between the enclosure and the linear features. The area to be scheduled is irregular on plan, to include the remains described and an area around them within which evidence relating to their construction, use and abandonment may survive. The scheduling extends up to but does not include the post-and-wire fence which marks part of the N boundary of the scheduled area. Specifically excluded are the above-ground elements of the post-and-wire fence that runs NNW-SSE across the site, and the above-ground elements of the telegraph poles crossing the field, to allow for their maintenance. The monument, which lies in the Parish of Coldingham and the County of Berwick as shown in red on the Plan annexed and executed as relative hereto [redacted] is hereby included in the Schedule of Monuments appearing to the Scottish Ministers to be of national importance compiled and maintained by them under section 1(1) of the Ancient Monuments and Archaeological Areas Act 1979.

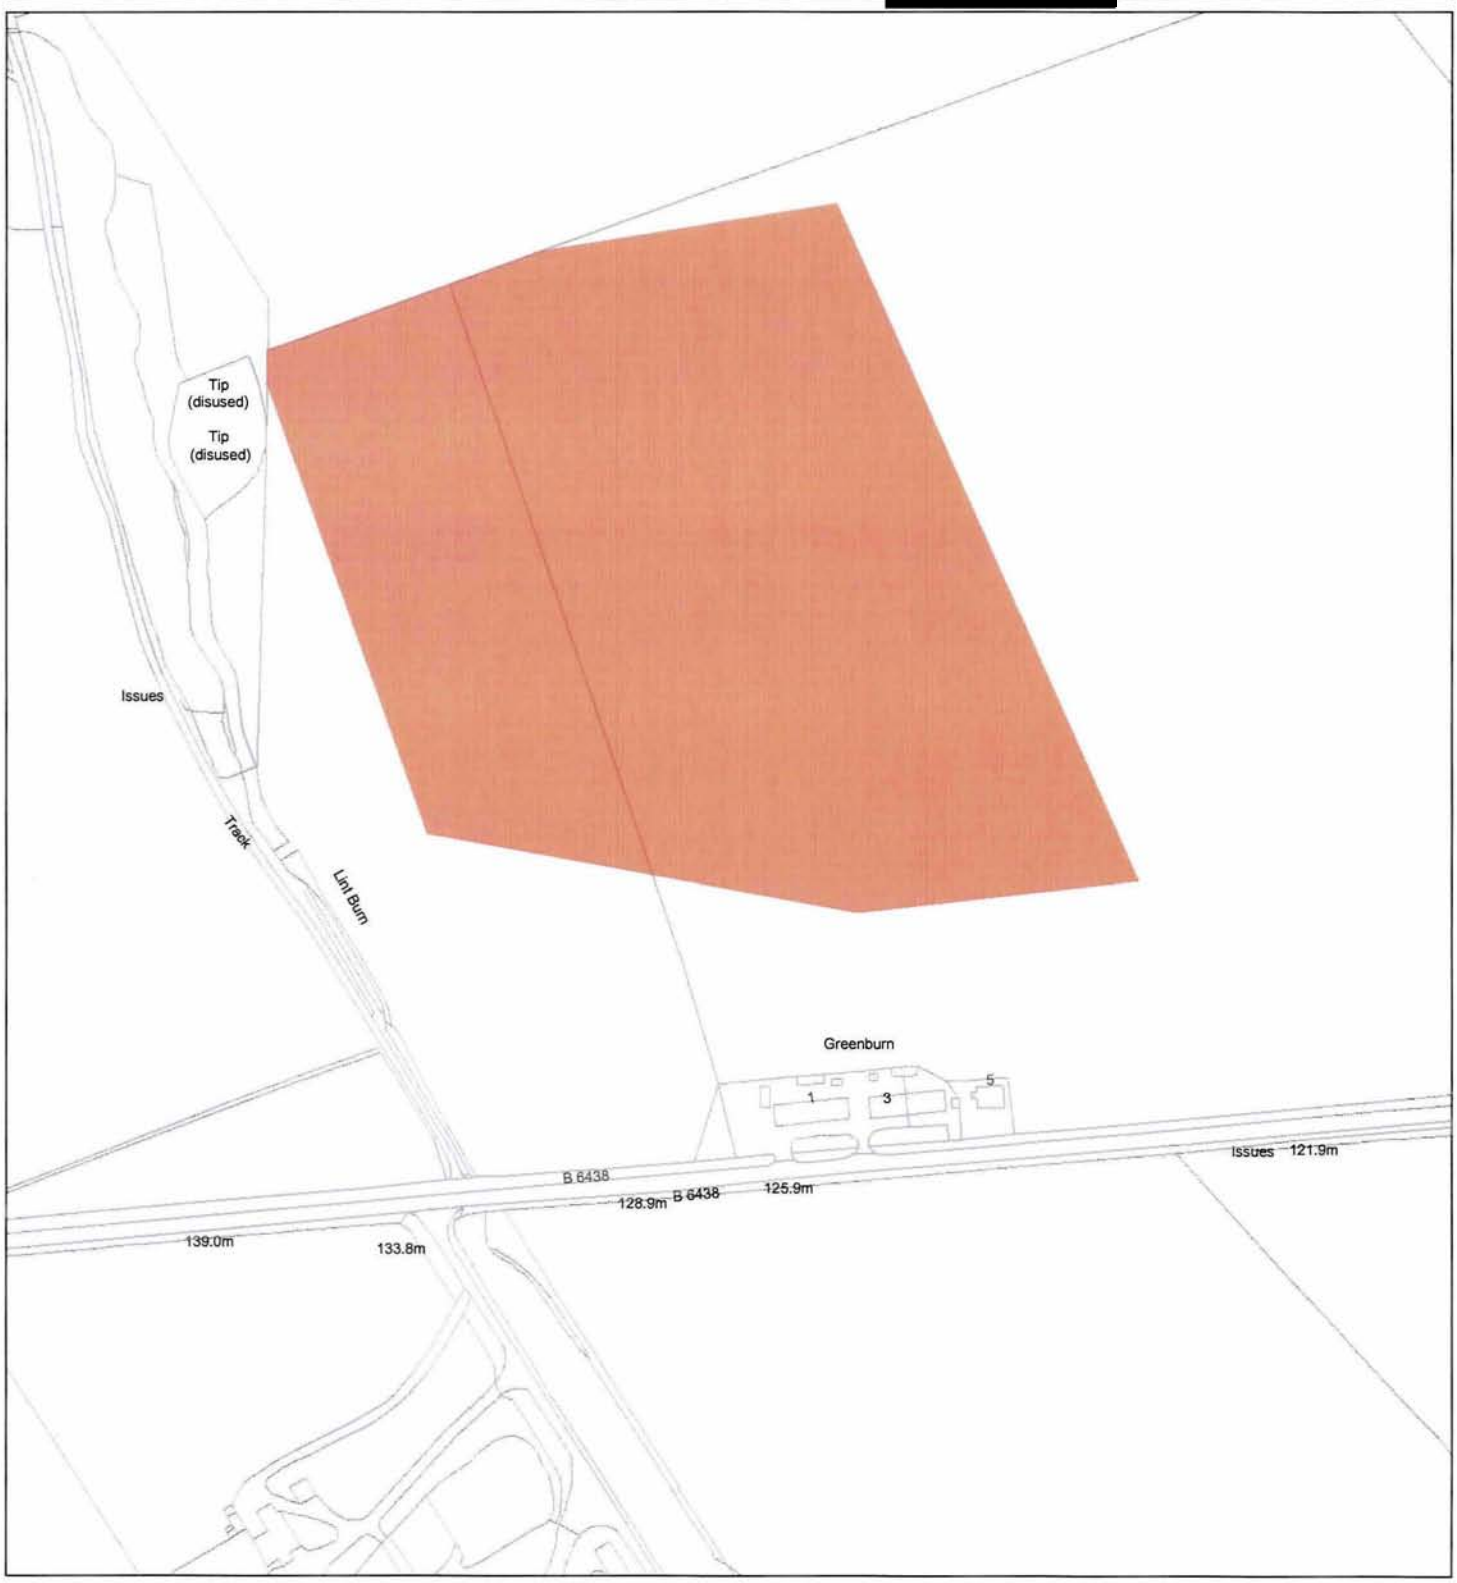

Subscribed by Malcolm Cooper, Chief Inspector with Historic Scotland, being an officer of the Scottish Ministers at Edinburgh on the 31 day of March Two thousand and nine, before this witness Luke Wormald, of Longmore House, Salisbury Place, Edinburgh.
