THE ANCIENT MONUMENTS AND ARCHAEOLOGICAL AREAS ACT 1979
ENTRY IN THE SCHEDULE OF MONUMENTS

The monument known as Antonine Wall, Mount Pleasant Gas Governor to WNW of N Dalnottar Cemetery comprises a section of the Antonine Wall which runs up a slope to the WNW of North Dalnottar Cemetery. The Antonine Wall at this location consists of the rampart, the ditch, the berm (area between rampart and ditch) and the upcast mound. The area to be scheduled measures a maximum of 482m between its extreme E and W points by a maximum of 64m N-S, to include the Antonine Wall rampart, berm (area between ditch and rampart), ditch and upcast mound and also an area to the N and S where traces of activities associated with the construction and use of the monument may survive. The E edge of the scheduled area is defined by a field boundary. The S boundary at its E end skirts an old quarry which will have removed all archaeological deposits at this point. Beyond the quarried area, the S boundary extends 20m beyond the S edge of the rampart to include Roman-period deposits which are likely to survive in this area; the military way may also be located within this zone. At its W end the S boundary follows the field boundary and then cuts in to run NE of the farm track. The NW corner of the scheduled area is defined by a burn. The N edge of the scheduled area then extends 25m beyond the N edge of the Antonine Wall ditch, to include the upcast mound and an area beyond it in which traces of activities associated with the construction and use of the Wall may survive. The top 50cm of the farm track to the SW of the scheduled area is excluded. The monument, which lies in the Parish of Old Kilpatrick and the County of Dumbarton as shown outlined in red on the Plan annexed and executed as relative hereto

is hereby included in the Schedule of Monuments appearing to the Secretary of State for Scotland to be of national importance compiled and maintained by him under section 1(1) of the Ancient Monuments and Archaeological Areas Act 1979.
