THE ANCIENT MONUMENTS AND ARCHAEOLOGICAL AREAS ACT 1979
ENTRY IN THE SCHEDULE OF MONUMENTS

The monument known as Thom's Water Cuts, aqueduct and dam, Little Barone to Kirk Dam comprises an aqueduct and dam. The monument includes all the stretch of aqueduct in water, together with the following structures: (1) the clapper-bridge immediately west of the Loch Fad road; (2) the arched bridge with clapper extension at its west side under the Loch Fad road; (3) the dam at the north end of the Kirk Dam reservoir including the drainage tunnel with its upper sluice, and the overflow, and (4) the bottom stretch of the Foley Cut as it enters the Kirk Dam reservoir. The area to be scheduled includes the aqueduct plus all of the aforementioned structures, together with an area around them in which traces of activities associated with their construction and use may survive. The area to be scheduled is very irregular in plan, with a total length in the order of 1200m, extending from S of Barone Road by way of Cnoc na h-Ulaidhe (where it widens out from 15m to 25m at the start of the embanked section) and the NW end of Kirk Dam, where it widens again to include the dam and its associated features, reaching a maximum width of 70m before narrowing to 15m again for its final stretch which terminates at a small bridge approximately 100m WNW of St Mary's Well. The monument, which lies in the Parish of Rothesay, North Bute and the County of Bute as shown outlined in red on the Plan annexed and executed as relative hereto

is hereby included in the Schedule of Monuments appearing to the Secretary of State for Scotland to be of national importance compiled and maintained by him under section 1(1) of the Ancient Monuments and Archaeological Areas Act 1979.

Given under the Seal of the Secretary of State for Scotland.
