THE ANCIENT MONUMENTS AND ARCHAEOLOGICAL AREAS ACT 1979
ENTRY IN THE SCHEDULE OF MONUMENTS

The monument known as Airigh a'Choire Ghlais, shielings, comprises a shieling ground, containing the remains of at least eighty-seven huts, at least thirty-four smaller structures and several enclosures or stells, visible as upstanding features. Sheilings were temporary settlements related to the summer movement of livestock to high pastures and date to the centuries immediately prior to the Improvement period. The area to be scheduled encompasses the visible features and the area immediately around and between them. It is irregular with maximum dimensions of 1100m from NNE to SSW by 500m transversely. The western boundary of the designated area follows the 530m contour. The eastern boundary of the designated area follows, for the most part, the W edge of the current access track. On the N, the boundary follows the S edge of the modern road. On the S, the boundary passes to the N of the hydroelectric intakes before including those structures and the area immediately around and between them on the ridge that extends to the SW. The current access track is specifically excluded from the scheduling, as is the modern footbridge. The monument, which lies in the Parish of Kenmore and the County of Perth as shown outlined in red on the Plan annexed and
