THE ANCIENT MONUMENTS AND ARCHAEOLOGICAL AREAS ACT 1979 13133
ENTRY IN THE SCHEDULE OF MONUMENTS

The monument known as Dam of Helliers Water, square cairns and stone setting 90m W of comprises the remains of a series of probably funerary monuments: a square cairn, another possible square cairn and a boat-shaped stone setting, all dating probably to between AD 200-900. These features are located within a circular stony area, approximately 12m in diameter, while the remains of an oval enclosed field, 22m E-W by 17m transversely, lie immediately to the west, suggesting that the probable funerary monuments may overlie prehistoric remains. The monument stands about 80m above sea level, on the summit of a small low hill that lies between the larger Hill of Sobul and Hill of Colvadale, overlooking Helliers Water. The area to be scheduled is oval in plan and includes the remains described above and an area around them within which evidence relating to the monument's construction, use and abandonment may survive. The monument, which lies in the Parish of Unst and the County of Orkney and Zetland as shown in red on the Plan annexed and executed as relative hereto [redacted], is hereby included in the Schedule of Monuments appearing to the Scottish Ministers to be of national importance compiled and maintained by them under section 1(1) of the Ancient Monuments and Archaeological Areas Act 1979.

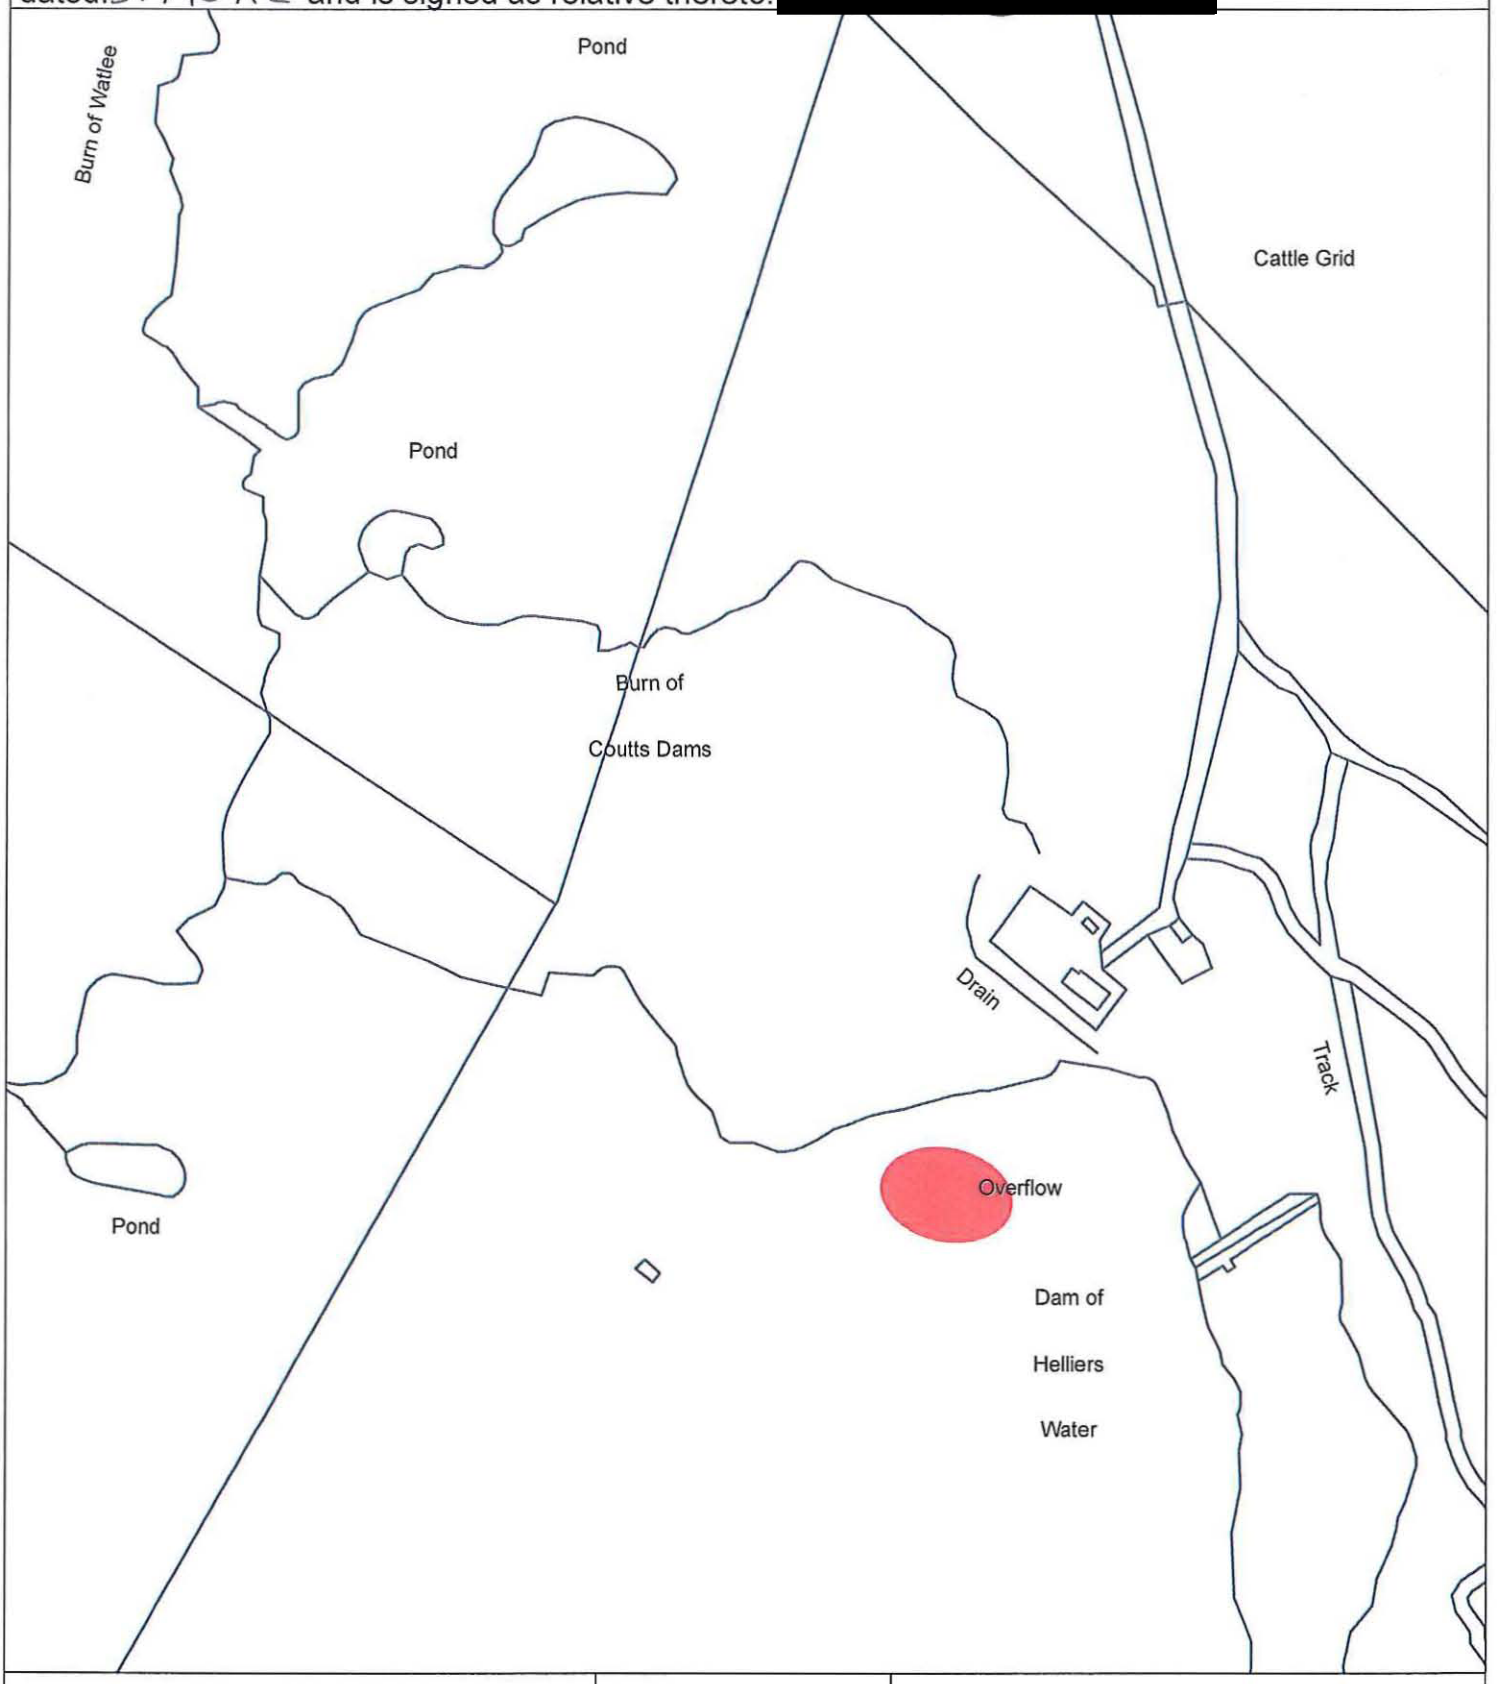

Subscribed by Barbara Cummins, Director of Heritage Management with Historic Scotland, being an officer of the Scottish Ministers at Edinburgh on the 31st day of October Two thousand and twelve, before this witness Victoria Murray, of Longmore House, Salisbury Place, Edinburgh.
