

Scalloway castle – Alteration of yetts

Typical yett installation with polycarbonate sheet (Lexan) behind to stop wind scour, litter and cat ingress.

Typical yett fenestration. New Lexan to be fitted to each opening. Stainless steel bar frame secured with SS. 'P' clips to Lexan to carry SS. net to form vent to central panels.

Yett to be carefully removed and fixing bar modified to form a half lap termination with matching half lap in non-ferrous metal, to be fitted into masonry. Yett to be blast cleaned and redecorated, Lexan renewed and new stainless steel mesh panel to centre.
