

Ancient Monuments and Archaeological Areas Act 1979 Scheduled Monument Consent Decision Notice

Case ID	201602521	Index No	M5613
Scheduled Monument	Rait, old parish church		
Location/Address	Perth and Kinross		
Proposed Works	Masonry consolidation works, including the installation of new safe lintels, consolidation and repointing, soft capping, and levelling of the interior		

Historic Environment Scotland hereby **grants** scheduled monument consent for the works detailed below, subject to the attached conditions.

Consented Works:

- a) Masonry consolidation works, including the installation of new safe lintels, consolidation and repointing, soft capping, and levelling of the interior

as described in your application dated 28 July and the following supporting documents:

- 1) Structural lintel detail – 600400_DG-01-P2
- 2) Elevation repair and spec – Rait WD07 Rev E
- 3) Elevation repair and spec – Rait WD08 Rev D
- 4) Elevation repair and spec – Rait WD09 Rev C
- 5) Elevation repair and spec – Rait WD10 Rev B
- 6) Engineers report
- 7) Email from Sophie Nicol to Oliver Lewis dated 23 September 2016 regarding bat survey

Conditions referred to above

1. No work associated with the levelling off of the ground surface or treatment/disposal of carved stone shall take place until Historic Environment Scotland has approved in writing a written scheme of investigation (WSI) from an archaeological contractor to cover the works.

Reason: to ensure that archaeological information is adequately recorded during the course of works.

2. The applicant shall provide Historic Environment Scotland with a timetable for works at least 2 days prior to the commencement of works on site.

Reason: to enable Historic Environment Scotland to monitor the progress of the works that have been consented.

3. A series of annotated photographic records taken before, during, and after the works to show the masonry consolidation works, including the installation of new safe lintels, consolidation and repointing, soft capping, and levelling of the interior should be submitted to Historic Environment Scotland within 4 weeks of completing the works on site.

Reason: to provide an accurate record of the site before, during, and after the various works have been completed.

Reasons for the Decision:

Subject to compliance with the schedule of conditions, the works proposed are considered acceptable in meeting the terms of national policy for scheduled monuments, and also accounting for other material considerations.
