4 Summary of proposed works (max 20 words)

Fence off the scooped settlement at about 6m. distance to prevent access and damage by constant horse traffic (average 20 per day in single file through it).

5 Description of proposed works

Erect c. 500 meters of fencing to re-instate the field which is clearly marked on most maps, including the one submitted herewith from RPID. This field will slightly deviate from its old boundary to ensure that the settlement is fully enclosed into the field at a distance of about 6 m. This enables the horses, which ride (often galloping) in single file into the settlement, to detour round it.
