21st November 2016

Mr John Marr
Historic Scotland
Melrose Abbey

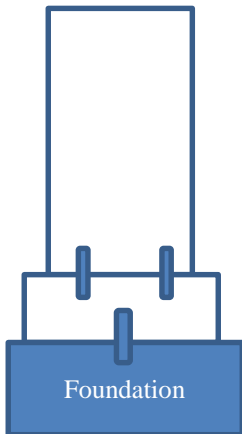

Methodology statement

Excavation of foundations:- to an approximate depth of 450mm and 50mm wider than all edges of the base, joint between base and foundation to be under ground

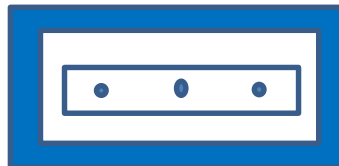

Concrete mix:- 20mm gravel / sand mixed with cement to a ratio of 1 cement to 4 concrete mix

Dowels and jointing:- 25mm threaded stainless steel dowels to joint between base of memorial and foundation, (acting as anchor pin) base bedded on pure cement bed

Dowels between plate and base:- 16mm threaded stainless steel dowel fitted into drilled holes and anchored with “Memfix” chemical resin

Elevation of position of dowels and foundation

Plan showing memorial on Foundation
