Ancient Monuments and Archaeological Areas Act 1979

It is important that you read the accompanying Scheduled Monument Consent Application Guidance Note to avoid any delay in processing your application. You can complete and submit this form by email (scheduledmonumentconsent@hes.scot) or by post to Heritage Directorate Business Support, Historic Environment Scotland, Longmore House, Salisbury Place, Edinburgh, EH9 1SH.

1 Applicant name and address

Title	Mr	**First Name**	Andrew	**Surname**	Sinclair
Company / Organisation	Glasgow City Council				
Building No / Name	Glasgow Botanic Gardens				
Street	730 Great Western Road				
Town / City	Glasgow				
County / Region	Lanarkshire				
Postcode	G12 0UE				

2 Monument to which application applies

Index no	SM3883	**Name**	North Woodside Flint Mill
Local Authority	Glasgow City Council	**Grid Ref**	NS56NE 105
Description of location of land	125 Garriochmill Road, Kelvin Walkway, Former North Woodside Flint Mill		

3 Pre-application discussions

Have you undertaken pre-application discussions with Historic Environment Scotland? (If yes, please give details below) Y ☒ N ☐

Site visit and email communication with Senior Planning HES Officer Victoria Clements. Following a site visit Ms Clements advised on draft application and offered suggestions and corrections.

4 Summary of proposed works (max 20 words)

Installation of wooden safety railing along the side of lade, installation of support posts into northern boundary of SM site.

5 Description of proposed works

North Woodside Flint Mill was historically powered by a water wheel fed by a water course fed from the River Kelvin running from Jacksons Dam down to the outflow at the rear of the site back into the River

Kelvin.The lade runs adjacent to the River Kelvin walkway for 100 metres. The walkway is a very busy core path linking the River Clyde in Glasgow City Centre to the rural city periphery of East Dunbartonshire. The walkway is a heavily used pedestrian footpath and a National Cycle Route (NCR 75) utilised by recreational walkers and communting cyclists. The 2 m drop from the walkway to the lade has been noted as a health and safety issue with some points lined with metal fencing and others with wood double rail fence. The main length of the lade is open and unprotected and the existing wooden fencing is now unsafe and has temporary barriers. This project will involve the installation of 100m of new safety railing along the whole mill lade. The fencing will consist of Timber Fence Post & Double Rail. Using Opepe Hardwood, including shouldered round at top of post / morticed for 100 x 35 rail, posts concreted.) This will run along the North edge boundary of the scheduled site along the side of the Kelvin Walkway. The Company instructed to undertake these works is Go.Wright Contactors under Gordon Cartwright BSc CEng MICE The support posts are to be spread to avoid the disturbance of existing roadside cobbles if possible.. Where removal of granite sets is required hand digging will be utilised to remove the sets. The posts have carved half round tops and are not suitable to be directly driven into the ground .The support posts will be installed at 1.8m centres, at these locations the hope would be to use a mechanical hand held (or mini digger attached) steel auger to screw a hole into the earth around 150mm -200mm diameter to allow the posts to drop in and any remaining void be filled with a dry concrete mix to provide stability, these holes will be not greater than 600mm deep. There is no necessity for any vehicle to access the scheduled site as the task can be completed from the tarmac surface of the walkway outwith the scheduled area. The walkway section has undergone historic disturbance and follows the path of the North Glasgow Sewer Line. It is noted that the Scheduled Area itself underwent significant landscaping works in 1975 when the lade was relined and a large section of the lade retaining wall was altered and lowered

6 Indicative timescale for proposed works

Fencing Works to be complete in 2022 before breeding bird season 2023

7 List of plans, drawings and other documents accompanying application (continue on separate sheet if necessary)

No	Description	Reference	Document emailed	Document posted
1.	Location Map of Lade	Lade Location 2022	☒	☐
2.	Location Map of fencing	Fence Location	☒	☐
3.	photograph of fencing	Fencing type	☒	☐
4.	method statement by Go Wrights	Go Wright 1	☒	☐

8 Nature Conservation – Protected Places and Species

Will the proposed works affect any of the following (please tick):

Yes	No	
☐	☒	**Site of Special Scientific Interest**

If yes, do you consent to your personal information and this application being passed to Scottish Natural Heritage for the purpose of processing an application for SSSI consent, should this be required? ☐ Yes ☐ No

☐	☒	**Special Protection Area**
☐	☒	**Special Areas of Conservation**
☒	☐	**European Protected Species**
☒	☐	**Other Protected Species**
☒	☐	**Other Biodiversity Concerns**

Please give details below

- European Protected Species – potentially Otter which has been recorded in the vicinity.(Actions see below).
- Other Protected species – Kingfisher (schedule 1 bird) recorded – check for presence of breeding birds of all species before any works commence at riverbank.
- Other biodiversity concerns

Otter info to add to contractor RAMS via NatureScot

Avoid working in the vicinity of otter habitat during the hours of darkness and within two hours after sunrise and two hours before sunset. This can be reduced to one hour between November and February (inclusive) because of the limited daylight
