4 Summary of proposed works (max 20 words)

Specialist conservation works to projecting stone spout

5 Description of proposed works

Conservation works will be carried out by HES specialist stone conservators to a high level spout on the west elevation of the bell tower. The spout is fractured and requires careful cleaning, assessment and further treatment. The methods will be as described in attached report.
The crack in the spout was discovered during the High Level inspection in March 2024. It is hoped to carry out this work in mid October 2026, before temperatures are too low for the conservation materials and to ensure the crack is repaired before winter.
